# Steel shredder

# In detail

## Steel shredder

This masher is a universal device for applications ranging from fruit processing to general feed preparation all the way up to yard-waste crushing/composting. It is suited for the processing of pitted fruit, beets, potatoes, corn, and other products.

The changeable masher screens make it possible to influence the grinding fineness and structure.

### Technical details

- Sturdy, powder-coated steel design
- Removable gutter
- The tools, consisting of blades, mashing screen and ejector can be dismantled and directly attached to the motor shaft
- Feed crushing in agricultural applications
- Beets, potatoes, old bread ...

Blade rotor complete

Technical data	Steel shredder
Connected load in kW	4
Electrical connection*	400 V/50 Hz (three-phase, 16 A)
Rotational speed in rpm	2,800
Length/width/height dimensions in mm	750/750/1,180
Weight in kg	53

Expressly subject to technical changes and errors.
